

MGED +Green Choice

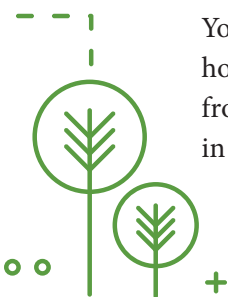

FOR AN EASY WAY TO GREEN YOUR ENERGY

The choice is yours

You have a new choice to “green” your energy use.

MGED now offers you the option to choose the type of energy you support when using electricity by participating in the +Green Choice program. It's a *simple and affordable* way to join the thousands of electric consumers supporting a greener power option when they pay an electric bill. Revenues from this charge will be used to purchase 100% renewable certificates from green energy sources such as wind, solar and hydro. The +Green Choice option is available to all MGED residential and commercial customers and is completely voluntary.

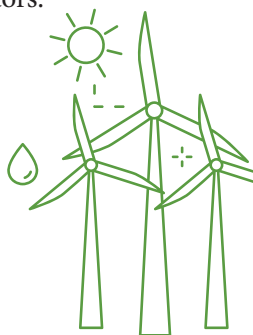

You'll pay just 2 cents more per kilowatt hour to support the production of energy from renewable energy sources based here in New England. This is an additional charge on your monthly electric bill. By giving 30 days' notice, you may end your participation at any time. Why not try the +Green Choice?

How we make your green choice count

When you make the +Green Choice, your payments guarantee that renewable energy is added to the New England power grid in the amount that you use. This supply is not physically going directly to any one home or location but joins all energy on the grid. All +Green Choice funds will buy Renewable Energy Certificates (REC's) from renewable energy generators.

This market provides a way to support this more expensive option compared to the value of conventional sources which may include fossil fuels.

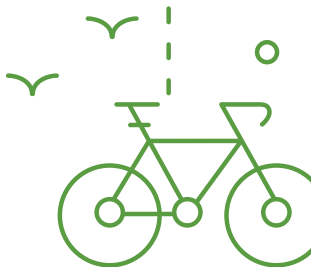

MGED +Green Choice

FOR AN EASY WAY TO GREEN YOUR ENERGY

A simple way to make the +Green Choice

Please complete this attached form, sign and mail it or drop it off at Middleborough Gas & Electric Department, 32 South Main Street, Middleborough, MA 02346. We'll do the rest.

Name: _____

Service Address: _____

MGED Electric Account #: _____

Phone #: _____

Email: _____

By signing this Agreement, I agree to be bound by conditions listed in the +Green Choice rate schedule and the general terms and conditions for service. This Agreement permits MGED to apply the +Green Choice charge to my electric bill for this account for all kilowatt hours billed until further written notice. I also understand that the current rate of 2 cents may change according to market conditions for the sales of Renewable Energy Certificates (RECs) on an annual basis.

Customer Signature

Note: all customers with accounts in good standing (monthly bills paid in full) will be eligible for this additional rate.

The +Green Choice
brings you an easier
option for a green energy
supply right now.
